

NEHA IYER

Senior Java Architect

20+ years of experience in Insurance domain delivering enterprise Java, Spring Boot, Microservices, Kubernetes, Docker, PostgreSQL, Kafka, AWS/Azure solutions. Exposure to LangChain, OpenAI APIs, RAG and vector databases.

Core Skills

Java, Spring Boot, Microservices, REST APIs, Kafka, Docker, Kubernetes, AWS, Azure, PostgreSQL, Redis, CI/CD, Git, Agile

Professional Experience

Company 1 (2004–2008)

Led architecture, solution design, cloud migration, API integration, performance optimization, stakeholder management, mentoring, and modernization initiatives.

Company 2 (2009–2013)

Led architecture, solution design, cloud migration, API integration, performance optimization, stakeholder management, mentoring, and modernization initiatives.

Company 3 (2014–2018)

Led architecture, solution design, cloud migration, API integration, performance optimization, stakeholder management, mentoring, and modernization initiatives.

Company 4 (2019–2023)

Led architecture, solution design, cloud migration, API integration, performance optimization, stakeholder management, mentoring, and modernization initiatives.

Projects

- Digital Transformation
- API Modernization
- Cloud Migration
- AI Knowledge Assistant POC

Achievement 1: Delivered scalable enterprise systems and contributed to architecture governance, DevOps adoption, and GenAI proof-of-concepts.

Achievement 2: Delivered scalable enterprise systems and contributed to architecture governance, DevOps adoption, and GenAI proof-of-concepts.

Achievement 3: Delivered scalable enterprise systems and contributed to architecture governance, DevOps adoption, and GenAI proof-of-concepts.

Achievement 4: Delivered scalable enterprise systems and contributed to architecture governance, DevOps adoption, and GenAI proof-of-concepts.

Achievement 5: Delivered scalable enterprise systems and contributed to architecture governance, DevOps adoption, and GenAI proof-of-concepts.

Achievement 6: Delivered scalable enterprise systems and contributed to architecture governance, DevOps adoption, and GenAI proof-of-concepts.

Achievement 7: Delivered scalable enterprise systems and contributed to architecture governance, DevOps adoption, and GenAI proof-of-concepts.

Achievement 25: Delivered scalable enterprise systems and contributed to architecture governance, DevOps adoption, and GenAI proof-of-concepts.
